

Accessibility Statement for Remitly Europe Limited (“Remitly Europe”)

Effective Date: June 28, 2025 Last Reviewed: June 28, 2025

Commitment to Accessibility

At Remitly Europe Limited, we are committed to ensuring digital accessibility for people with disabilities. We are continually improving the user experience for everyone and applying relevant accessibility standards in compliance with the **European Accessibility Act (EU Directive 2019/882) (“EAA”)**.

Our goal is to make our digital products and services—including our website, mobile applications, and online customer interfaces—perceivable, operable, understandable, and robust for all users, including those relying on assistive technologies. This accessibility statement applies to our consumer online money transfer services (“**Service**”). This statement provides an overview of how the Service meets the relevant accessibility requirements in the EAA.

General description of the Service

We provide a digital cross-border remittance product that is accessible via our mobile app or the web. Our customers are able to set up an account and start sending money via a variety of payment methods to international recipients generally within minutes. Recipients can receive funds in multiple ways using our global disbursement network. Our customers can also track the status of their transactions as they are processed.

How the Service meets accessibility requirements

Remitly Europe is actively working to ensure that its digital offerings conform to the relevant accessibility requirements set out in Annex I of the EAA and the **Web**

Content Accessibility Guidelines (WCAG) 2.1, Level AA. We regularly audit our platforms to assess compliance and address any gaps identified.

Measures to Support Accessibility

To achieve and maintain accessibility, we have implemented the following measures:

- **Accessibility Governance:** Accessibility is embedded in our product development and compliance processes.
- **Inclusive Design:** We incorporate accessibility features in the design and testing phases of our website and mobile applications.
- **Third-Party Reviews:** We engage external experts to conduct accessibility audits and user testing.
- **Assistive Technology Compatibility:** Our platforms are tested with screen readers, keyboard navigation, voice input tools, and other assistive technologies.

Non-Accessible Content

Despite our efforts, some parts of our website and apps may not yet be fully accessible. We are currently working on the following:

- Enhancing alternative text for some images.
- Ensuring consistent and descriptive link text.
- Improving form error messaging and navigation structures.

A full audit and remediation plan is in progress to address these areas.
